Imagine what it would be like if we could find a cure for cancer. Or an effective vaccination for HIV and AIDS. Or a medicine that could protect against heart disease or stroke.

Companies such as GlaxoSmithKline have already made breakthroughs that have saved millions of lives and hundreds of thousands more are living longer and living healthier.

So when we say our goal as a company is to help people '**do more, feel better, live longer,**' it means a lot more than just another advertising slogan or corporate mission statement.

The work we've done in the past has led to some of today's most effective treatments; the research we do now and in the future could find the new medicines for tomorrow's cures.
